## 4. Canopy Installation

Before placing the canopy onto the load bin, check that the D-Rubber is intact on the canopy. If this is not done, the canopy and/or load bin could be damaged or can cause leaks into the canopy.

To position the canopy, ensure that it is flush with the load bin.

#### 4.1. Canopy Fitment to Load bin

Open all the doors of the canopy and place onto the load bin.

##### a) Step 1 – Bolting the Universal Bracket to the Support Bracket.

In Figure 17 and Figure 18 below shows how the universal bracket is mounted to the front and rear support brackets.

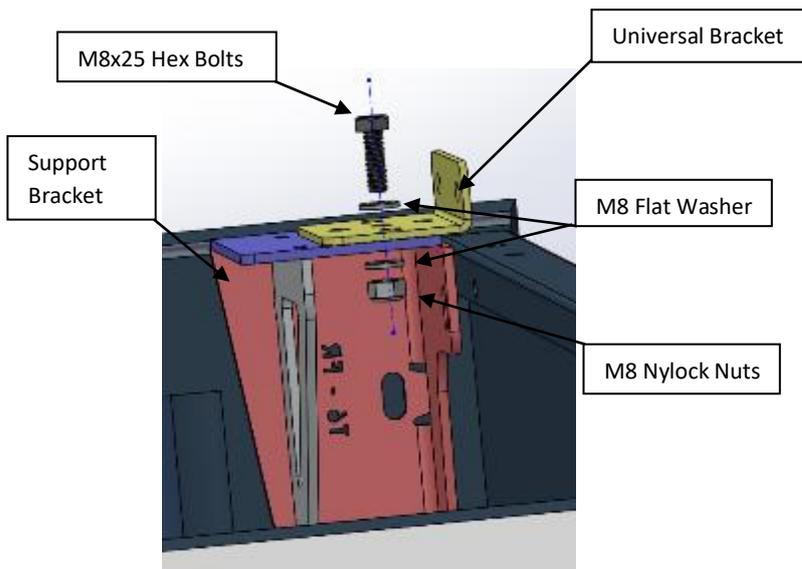

Figure 17: Universal-Front Bracket Mounting Assembly

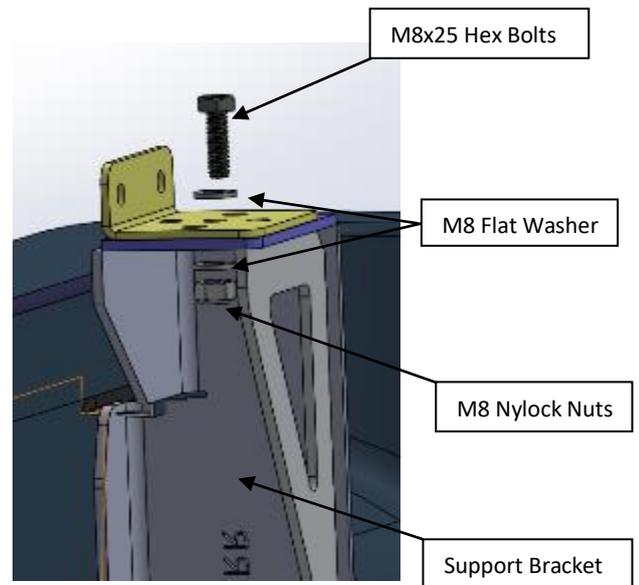

Figure 18: Universal-Rear Bracket Mounting Assembly

##### b) Step 2 – Bolting the Universal Bracket to the Canopy

When the Universal bracket is bolted to the mounting brackets, it should then be mounted to the canopy. In Figure 19 and Figure 20 shows the fastener assembly.

The canopy must rest solely on the mounting brackets and no load is allowed on the load bin. Once this is completed, the canopy has been installed successfully.
