

**Date:**

May 2019

**Description:**

ARB Rock Sliders

**Application:**

Suzuki Jimny MY19

**Part No. & Barcode:**

4424010 - 9332018062918

**Product Group:**

020 - Side Rails/Steps

**Fitting:**

1 Hour

**Availability Date:**

Pilot run due late May 2019. First production run June 2019

---

## Product Specification

For the Australian media launch of the eagerly awaited Jimny, Suzuki Australia enlisted ARB to develop a static display of a kitted out Jimny called “Project JBOX” with a specially designed ARB Summit Bar and ARB Rock Sliders.

The sliders are mounted parallel to the vehicle chassis providing protection to the vulnerable sills down each side of the vehicle. Made from 60.3mm steel tube, they attach to the vehicle chassis with a combination of mount brackets, M10 bolts and fasteners.

Three mount points are used to ensure that the weight of the vehicle is properly supported along the length of the slider. Chassis support tubes are 47.6mm x 2.6mm steel and the chassis brackets are 4mm laser cut, folded and welded sheet steel.

### Integrit Textured Powder Coat:

To complement the ARB Suzuki Jimny Summit Bar recently released, the Rock Sliders are finished in Integrit textured black powdercoat. Designed for maximum aesthetic appeal, the Integrit finish is designed completely with off road conditions in mind.

## Protection and Styling Characteristics:

- Vehicle specific design for the Suzuki Jimny MY19
- Durable steel construction for maximum protection
- Mounting system secures around the chassis via high tensile M10 fasteners
- Approximate weight of the sliders is 18kg (for the pair)
- Shipping dimensions 1380x530x275mm. Approximate shipping weight 20kg
- Finished in Integrit textured black powder coat. Integrit not suitable for colour coding
