------------------------------	--	-----------------------

Name: Air Compressor Bracket – Toyota Landcruiser 250 series (Euro Spec) - Rear Inner Guard

Short Description:

TLR682110

Air Compressor Bracket designed to suit fitment of all ARB Air Compressor Models into a Toyota Landcruiser 250 series (Euro Spec) Rear Inner Guard area.

Description:

Part Number: TLR682110

The TLR Products Air Compressor Bracket provides a clean and practical solution for securely mounting your ARB Brushless or Brushed, Twin or Single Air Compressor.

Designed to fit within the open space behind the rear left-hand side inner guard, the bracket positions the compressor in an easy to access location and provides optimal airflow around the compressor for ventilation.

The mounting bracket set also includes 2 optional ARB Air coupling and electrical switch mounts. The first option mounts directly to the main compressor bracket which positions the switch and coupling behind the main storage compartment door to ensure compatibility with the OE bottle jack location. The second option located the switch and coupling in the OE bottle jack opening for ease of access, this is generally the recommended option when installing in conjunction with the ARB 4L air tank.

Please note: Installing the tank kit requires relocation of the factory bottle jack.

NOTE: This Bracket set is designed to suit the European Variant of the Toyota Landcruiser 250 series.

Additional Components Required for installation (All Sold Separately).

- 1x Preferred Choice of ARB Air Compressor.
- 1x ARB Pump Up Kit (171302V2)
- 1x ARB Hose Reinforced JIC-4 0.3 Meter (0740201)
- 1x ARB Adapter Fitting (0740104)

Features:

- Versatile Compatibility - Suits both ARB Brushless and Brushed, Twin and Single Air Compressor models.
- Space Saving Design - Fits in the open space in rear quarter of the vehicle.
- Durable Construction - Laser cut from zinc-coated 2.00mm steel.
